

TrioTech has developed a considerable experience working at international level and for this reason we speak English as a second language.

We feel to be the right choice for a foreign customer, especially if our services are needed both in and outside Italy.

It is very important to be able to contact someone who not only has the professional experience but is also able to understand your needs and provide a professional service without the language barrier.

We feel this is a great advantage for international customers who may have for example their location in more than one country and may wish to manage a particular project spread over multiple locations.

We manage solutions that go from MultiMedia, Digital TV (terrestrial and satellite systems also for the reception of TV channels not normally distributed in Italy) IT, Security and Energy Systems (electrical systems, solar panels, energy automation, etc.).

If you have any questions regarding our services please feel free to call or email us, you'll find the details on the [Contact](#) page under the [International](#) contact entry, we will be pleased to answer your queries.

We look forward to hearing from you

Thank you

TrioTech

Our business, your comfort !
